

Environmental guidelines

Göhler has expressly set itself the goal of acting in harmony with our environment in all its business activities and thus making a decisive contribution to protecting and preserving it. This is also reflected in our ISO 14001 certification.

This is not limited to the manufacture of our products and services. services.

In order to realise our ambition, we have defined the following environmental environmental guidelines listed below as the binding content of our business policy:

- We comply with environmentally relevant requirements and laws. We undertake to comply with the relevant laws and ordinances as well as the requirements imposed on us with regard to environmental protection and occupational safety requirements imposed on us and to achieve our own objectives.
- We pay attention to environmentally friendly processes already during the conception and construction of our plants
- We regard the protection of the environment and the economical use of natural resources as our social obligation.
- We are guided by the principle of sustainable management.
- We use energy, raw materials and water sparingly.
- We avoid or minimise environmental pollution such as waste, waste water and emissions.
- We avoid noise emissions by using low-noise equipment and machines.
- We are committed to continuously working on reducing environmental pollution and improving air quality.
- We integrate all environmentally relevant business processes such as the management of natural resources, waste avoidance, a responsible handling of chemicals as well as reuse and recycling reuse into our management system and are constantly looking for improvements.
- We promote environmental awareness among our employees in order to protect the environment in all areas of the company and use raw materials and energy sparingly.
- The responsible procurement of raw materials is an integral part of our corporate guidelines.
- We are actively committed to a balanced relationship between ecology and economy in order to leave our children an environment worth living in.
- In addition to the protection of water, air and soil quality, we support initiatives against land use and deforestation.
- Animal welfare is as important to us as the preservation of biodiversity.

- We see the reduction of greenhouse gas emissions as an important measure in the decarbonisation process. At Göhler, we achieve this through the use of renewable energies and the efficient use of energy. Through further training and clarification we inform our employees about the necessity and advantages of decarbonisation and win their support.
- As part of our environmental management system, we report on our greenhouse gas emissions
